

Instructions for mini wall decoration

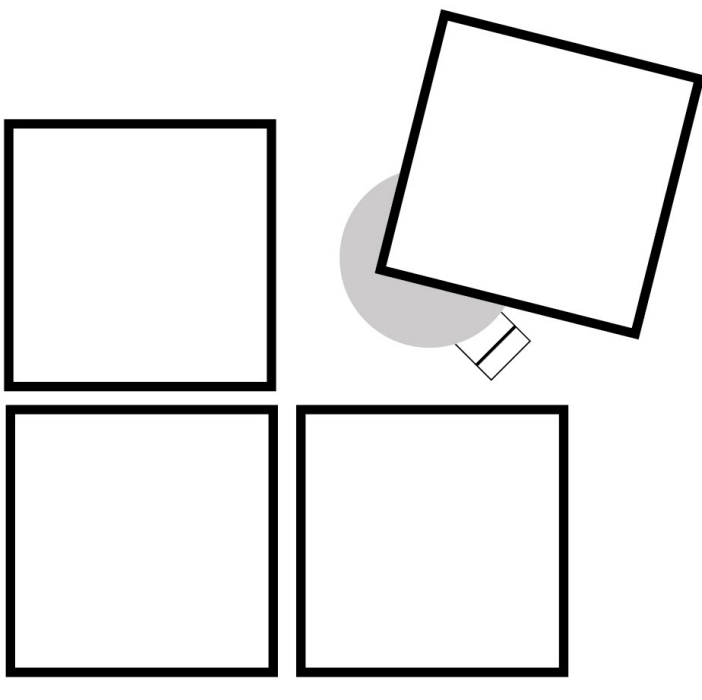

1 Separate the silver disc with the adhesive strip from the black magnet. Remove the protective film from the adhesive strip.

2 Use the adhesive strip to attach the disc onto the wall and press down for at least five seconds.

3 Attach and centre the mini wall decoration on the silver disc.

4 If you have several mini wall decorations, you can swap them around however you choose. Always push the mini wall decoration sideways away from the adhesive disc.

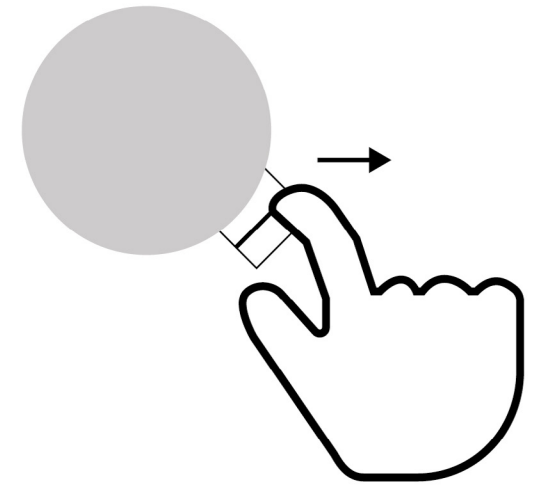

General instructions

Make sure that the surface is firm, clean, dry and free of grease, otherwise a firm hold cannot be guaranteed. Use window cleaner or methylated spirits.

To ensure the maximum holding force for the adhesive strip, press it onto the background surface firmly for at least five seconds.

Do not touch the adhesive surface once the protective film has been removed, otherwise the holding force may be impaired.

To remove, hold the adhesive strip by the grip tab and slowly pull it out sideways and parallel to the wall.

Replacing the mini wall decoration

Always push the mini wall decoration sideways away from the adhesive disc. To avoid damaging the wall, do not pull the mini wall decoration from the adhesive disc head-on.
